

GARDEN DESIGN

WHAT IS GARDEN DESIGN?

Garden Design is the art and process of designing and creating plans for layout of gardens and landscapes.

ACTIVITY

On the next pages, cut out the landscape features or draw your own to design. Remember you don't always need full squares, you could cut them in half, or even into triangles.

Things to consider...

1. What will your garden be for? For example, is it for people to relax in, or for them to grow fruit and vegetables, or is it to encourage wildlife?
2. What's your style/theme...formal, modern, traditional, funky?
3. Would you like your new garden to include features (timber structures, ponds, statues and so on).
4. Are there any particular colours you want to include in the plants and materials.
5. Will your garden have to cater for any special requirements (access, construction, wheelchairs, pets and so on).

EXTENSION

6. What is the timescale for your project?
7. What budget have you allocated for the project?
8. Have you seen any images or visited gardens that you really liked?
